

4.05 PRIMAFLEX SPIRA BAG & BELT

Temperature range -20 °C bis 100 °C

Description

Hot air hose with integrated transport bag. For the medium temperature range of -20°C to +100°C. Made of PVC-coated polyester fabric and outside with a spring steel spiral incorporated under a scratch protection. Handcrafted with special know-how quality product made of high-quality raw material.

In addition, at one end with integrated transport bag, in which the entire hose can be easily and quickly stowed. Allows easy transport and safe, space-saving storage.

Excellent for conveying cold or hot air to mobile heaters and air conditioners for tent air conditioning and building heating.

Available in our online shop

Properties

- Lightweight
- Highly flexible
- High tensile strength
- Non-kinking
- Including transport bag
- Highly compact
- High compressibility
- With scuff protection
- Large diameters available
- Continuous connection possible
- Spiral-free sleeves

Application ranges

Construction site heating, , Drying grain, Heating fans, Hot air hoses, Winter construction site heating, Tent heating, Tent air-conditioning

Length

Standard length: 7,6 m. Other lengths on request.

Further informations

Also available upon request as spiral-free insulated flat hose.

For increased vacuum conditions also tailor-made narrower spiral slopes can be produced.

Also welded types available.

Color: yellow-black.
