

PRIMAFLEX UNI M2L ISO

Temperature range -55 °C to 150 °C

Description

Insulated, flame-retardant and vulcanised hose made of two layers of glass fibre fabric with a spring steel spiral concealed inside.

Very flexible air-conditioning hose in a special shape for concealed installation.

Developed to meet high fire protection standards and for use in areas subject to fire hazards.

Properties

- Dimensionally stable after pressure load
 - very good recovery properties
- space-saving
- fireproof
- two-ply
- smooth inside
- good flow characteristics
- flame retardant
- very good cold resistance
- highly flexible, even at low temperatures
- very light
- kink-proof
- small bending radii

Application ranges

- Air conditioning
- Rail vehicles
- Traction unit construction

Length

According to your specifications
